### farmers Department. FEEDING EARLY CUT GRASS.

In some notes on the farm of Hon. Harris Lewis of Frankfort, N. Y., President of the Little Fall Farmers' Club. by Mr. X. A. Willard, in the Country Gentleman, we find the following remarks on his use of early cut hay :-

Mr. Lewis holds that grass, all things considered, is the best food for milch cows; and that dried grass is cheaper and better for cows in the spring, than hay and grain. He usually commences cutting his grass in June-cures it, if possible, without rain, and so that it will come out of the mow with a bright green color, and with the fragrance of newly mown hay. This he uses for cows giving milk in spring, before turning out to pasture.

He used to feed his cows in spring with grains, ship-stuffs &c .-- often what would be called "high feeding"-but found it health prevailed in various ways, and his cows gave out sooner than they ought. He then changed to his present system of and warranted satisfactory. Goods sold by feeding, and with the most happy results. the yard, and garments cut and trimined. His cows are healthy, they keep in flesh, they yield a good supply of milk, and it is all done with much less expense than the grain feeding.

We have given the facts, and they may perhaps be suggestive to those who have been paying out large sums for grain to feed, and who perhaps have troubles in their herds for which they are unable to CLOTHS, CASSIMERES, DOESKINS account. If the system adopted by Mr. Lewis is the true one (and he contends that it is,) then it should be generally introduced. To say the least, it is worth the testing, and our stockmen and dairy-men will do wall to make a men will do well to make some provision, class Custom Made Garments, for a fair price, are the present season for harvesting a cros of " dried grass."

How to Grow Large Raspberries. Raspberries must be fattened, just as we at any price. fatten our mutton or pork, if we desire large, melting, delicious berries. Raspberry bushes cannot bear large, plump fruit-when standing in a grass-plot. Hoe Real Estate and Insurance Agent, up all the grass, and fork over the ground, all around the bushes. If they stand in rows, so that a horse-hoe can be worked making the surface as clean as a neat Putnam's and Fisher's between the rows, scarify all the ground, onion-bed. Then, if the soil is not sufficiently rich, haul back the dirt from the bushes, and manure liberally, and cover the manure again with mellow soil. Soapsuds is excellent for raspberry bushes.

To CIDER DRINKERS. After your cider becomes "hard," or sour in the spring, or summer, you may convert it into a delicious beverage by adding two pounds of strained honey per gallon; after it is dissolved, let it stand in a moderately warm place, until minute bubbles rise around the sides of the vessel, when it should be tightly bottled, and left in a cool cellar for several weeks. It is then more delicate to the palate and more wholesome to the stomach than much of the falsely-called champagne of the American market .- Jour. of Chemistry.

DRY HAY FOR COWS IN SUMMER. Cows sometimes get a surfeit of grass, above useful instrument. It is a true indicate, of their favors at the Old Stand, No. 25 Hanespecially in wet, warm weather, when not liable to get out of order and will last a life-cock Street. the grass is succulent and rich. This feed Mechanic, and should find a place in every housedistends the bowels uncomfortably. An armful of dry hay once a day, will serve receipt of Three Dollars (\$3,00). to absorb some of this moisture, and benefit the cow in several respects.

To make the tire on a wagon wheel stick, immerse the felloes in hot linseed oil an hour before setting the tire.

## Anecdotes.

An irrepressible boy of five years who was always compelled to keep quiet on IIE Subscriber having taken the new Shop, Sunday having grown inexpressibly weary towards the close of a Sabbath day, frankly and honestly approached his excellent but rather over strict father and gravely said:

" Pa let's have a little spiritual fun." This was too much not only for the gravity but also for the strictness of the and strict attention to the interest of his custom father and for once he "let nater caper" ers, to merit a portion of your patronage till bedtime.

"I wish," said the slight and elegant Mrs. Fitzbob to her friend Mrs. Tigg, whose embonpoint was strikingly handsome-"I wish I had some of your fat,

and you had some of my lean." "I'll tell you what is the origin of the wish," replied the fair wit; "you think

Poetry. For the Patriot. A NEW SPRING.

Anew the Spring-time 's come again, Green leaves and sunshine bright, For every ear a gay refrain, For every eye some sight Of added sweetness to drink in, All sprouting with delight : SACKS, The fragrant woods, the gushing spring Will open wide the heart, Oh golden Spring, oh laughing Spring, How beautiful thou art !

> From the wild crags, far, far away, Echo, fling back my song : Over the streams and plains to-day, Mountains, and flowery throng ! Alway I'd linger, I would not stray, Yet whether here, or far away,-As far as the Heavens retain their blue, Louder and louder my song shall grow !

As the world is changing ever, As destiny draws me on-If joy or sorrow sever, This certainty is won, Stronger courage for the strife, Joyful songs of Hope and Life, Lifes pleasures and its wrong, Life go'den-hued in song !

OTTO ROQUETTE. Translated by M. E. Lunt.

### IF A HUMBUG.

Quincy, July 11.

What a wonder That the doors Are open wide ; Ever since the First of August Pain Paint applied. Those who lie, Not acquaint: For they always Have been jealous When their patients Use Pain Paint. As high as mountain Flash the truth Before their eyes, But the cry Is always humbug, Men of science Full of lies.

Pain Paint has been tested, free of cost, over ten months, every day (except Sundays), at 170 Chathau square, N. Y., for the removal and cure of all manner of pain and disease. The office is constantly crowled with patients, rain or shine. Every person who buys Pau Paint, or tries it free of cost, knows that all who call it humbug tell a falsehood.

We want no poison in our lips, No pill to awallow down: We want no burning liniments In City, County, Town.

We want to know the laws of health, We want to shun disease, We want few Doctors' Bills to pay, Or Undertakers' fees.

We know all Pills have had their day, We never more shall greet,

And every child that lives. A TREMBLING MAN - THERE IS A MAN WHOSE hand does not tremble, but handles a brush with texterity, and lays on the PAINT that never leaves color dexterity, and lays on the PAINT that never leaves color or stain. He paints yirls, boys, men and women, by the hundreds, every day and evening. He removes pain as if by magic, of any name or nature, whether chronic or acute, from a simple mosquito bite to the most frightful cancer. Broken down, trembling patients, are sent by the officers of hospitals to WOLCUTT'S Office. No. 170 Chatham square, N. Y., and all pain is removed for every application, free of expense, without money or price, for the tenant of the sunken cellars of the meanest tenement house, or for the owners of brown stone and marble palaces of Fifth Avenue.—All, all are treated alike, and each wait their turn for an application of that

Oh, carry me home to my native shore, For my heart is sad and lone; And ere I die, let me gaze once more On my mother's cottage home. Oh, bear me back to the quiet shade Of the well known trysting tree; To the bubbling stream and the sunny glade The haunts of childhood's glee.

My spirit pines for my mother's love, And the grasp of her dear right hand, And to feel once more affection's kiss From the joyous household band. Then bear me back to my native shore, For my beart is sad and lone;

And ere I die, let me gaze once more

On my mother's cottage home.

## farmers' Department. CANNING FRUIT.

As the season of fruits is just commencing anything that will enable it to be successfully canned at small expense will very much prolong the season. Only those who have tried it know the satisfaction derived from eating a dish of strawberries or peaches in midwinter as fresh as when gathered. The annexed method of canning fruit was furnished to the New York Farmer's Club by Mrs. Powers, of Oswego county, New York:

"I will suppose your fruit and glass cans are all ready. I prefer cans with glass covers. I scald the fruit in a large tin pan with juice or water to cover it. Put half a tea-cup of cold water into the store, at the corner of fruit, and then another.

"Let them stand open till the hand can be held upon them without burning. As and warranted satisfactory. Goods sold by soon as filled cut wrapping paper the size the yard, and garments cut and trimmed. of the can, one for each, and when cool All Goods warranted as represented. slip one over the fruit entirely, and fill up the can on top of the paper with boiling juice and seal at once. Ladies, try this way; the fruit will never mould, and will keep any time, if you don't eat it. The papers keep the fruit from rising to the Merchant Tailor & Dealer top of the liquid. There is no use of setting cans into water to heat them, or CLOTHS, CASSIMERES, DOESKINS of putting them into quilted bags; it is too troublesome. I let the fruit shrink, and then fill up to the cover as close as possible. Ladies must be governed by their own common sense. Men attempt to tell them and they are likely to forget."

#### CUTTING HAY EARLY.

It is now better understood than formerly, that some kinds of hay should be cut early, especially for cows. But in the declaration of new doctrines we are disposed to go to the extreme. Because some grass cut in June or early July, makes better hay, it is not to be assumed that all grass will. Clover, orchard grass and timothy attain their growth and maturity rapidly and early, and very soon, if not cut, lose their good quality; and this is so also of some other kinds of grass growing on rich and warm uplands, and on any highly cultivated land. But there is a great deal of meadow which affords a very superior quality of hay, though cut late in August. This is the case with much of the bottom lands, or river meadows, where the grass does not attain half its growth by the fourth of July, and, if cut so early, would want its superior quality. It dries up rapidly, the juices being only partially developed, and it lacks nutriment. Any one who has had occasion to mow a strip of such grass in the early part of July, and to cut the grass adjoining this strip four weeks later, will be struck with observing the difference, not only in quantity, but in the quality of the two cuttings. There is also a great deal of upland natural meadow, where the grass is of slow growth and late, and where the quality of it for hay improves nearly as long as it continues to grow, retaining its good color and rich aroma quite late in the season. In seasons of low temperature, such meadows: will furnish an excellent quality of hay, cut as late as the first of September. Country Gentleman.

An exchange says that wood ashes hold. are a safe and sure cure for worms in horses. The ashes should be mixed with receipt of Three Dollars (\$3,00).

## Anecdotes.

A young lady who prided herself on her geography, seeing a candle aslant, re- stamps for circulars. marked, that it reminded her of the "Leaning Tower of Pisa."

"Yes," responded a wag, "with this difference, that is a tower in Italy, while this is a tower in grease."

Little Frank was taught that every one was made of dust. One day he was watching the dust in the street, as the is now prepared to execute all orders in the wind was whirling it in eddies.

"What are you thinking of?" asked his of Carriages, with neatness and dispatch."

there was going to be another little boy.

"I thought the dust looked as though ers, to merit a portion of your patronage.

A MOTHER'S INFLUENCE. A fair-haired boy was standing

Beside his mother's knee, Repeating in a sweet tone, The prayer of infancy. His heart was far away, Amid the school-boy troubles, which

Softly the mother laid her hand On his rich clustering hair ; Kindly she listened to his griefs, And soothed each little care, Gently she led his heart away To the sweet thoughts of heaven

Under an influence such as this, The fair boy's childhood passed; A mother sowed within his breast The principles that last. A mother's gentle hand restrained

The waywardness of youth; And brought his wandering footsteps back To rectitude and truth.

On that young brow to bind The wreath of noble intellect The stamp of Godlike mind. Yet still he cherished, bright and fair, The lessons of his youth ; His high and holy principles, His deep strong love of truth.

It is needless for us to state the success he has already achieved in the sale of his old standard remedy, the ANNIHILATOR, universally patronized for catarrh and colds in the head, which is to day the only leading and reliable remedy for that loathsome yet universal complaint. Still more, he now puts up the ANNIHILATOR in pints instead of half pants, and makes it one-quarter stronger and more efficient. He has cured, by the use of this valuable medicine, not only thousands of almost hopeless cases of catarrh, but hundreds of weak nerves. Many a man whose hands trembled to such a degree that it was impossible to read a newspaper without layin it on a desk, and who could scarcely write their nam it on a desk, and who could scarcely write their name once a week, find immediate benefit. Pint bottles hold three of the 50 cent bottles, and he sells fifty pint bottles to one of the smaller size. Thousands suffer who would be wholly restored from that disgusting disease, CA TARRH, which leads directly to lung complaints, dys pepsis, weak nerves, pain in the side and stomoch, and liver complaint. Doctors in general do not understand Catarrh, and few are bold enough to deny it. Nothing ever taken into the stomach can cure it, for the disease in the head. You might as well put a player on the foot to cure head. taken into the stomach can cure it, for the disease in the head. You might as well put a plaster on the foot to cure an ulcer on the hand —Cwarrh is an ulcration in the head and a ranning sore; the matter falls in the throat and clogs it; at night runs down to the stomach and undermines the whole constitution.

Catarrh snuff will always produce catarrh and aggravate the disease. A snezz is nature's most emphatic No, and dust of any kind is most positively injurious.

You must cure the festering ulcer in the head and the difficulty in the throat and stomach, from this load of phlegm constantly pouring from the head, is removed. It must be cleaned out, instead of adding snuff and more filth. Buy none of the Doctors' remedies unless in pure white wrappers. wrappers.

### MAIDEN'S LEAP YEAR PSALM OF LIFE.

Tell me not, in idle jingle, "Marriage is an empty dream !" For the girl is dead that's single, And girls are not what they seem.

Life is real ! life is earnest !

Single blessodness -a fib ! " Man thou art, to man returnest !" Has been spoken of the rib.

Life is long, and youth is fleeting, And our hearts, though light and gay, Still, like pleasant drums, are beating

Wedding marches on the way. Lives of married folks remind us We can live our lives as well,

And, departing, leave behind us Such examples as shall "tell." Such examples that another,

Wasting time in idle sport, A forlorn, unmarried brother, Seeing, shall take heart and court.

GRASS FOR HORSES.

Many persons think that horses that are kept in the stable all summer should not be allowed to eat grass. They think it will make the horse soft, wishy-washy, and that it will throw him out of condition for hard work. This is particularly the case with some of the trainers of trotting and running horses. And horses that are kept up for farm and other worl This was formerly the case more than the store, at the corner of it is now. But these are all erroneous HANCOCK AND GRANITE STS. natural system of feeding.

Grass is the natural food for the horse. It is cooling and healthful food. It keeps the bowels open and sharpens the appetite. It promotes digestion, and removes fever from the system. Therefore, by all means, let the horse nip grass fifteen or twenty minutes daily. Whether training for trotting or running it will be attended with the highest benefit. The horse will lose none of its speed by such a course Mcrchant Tailor & Dealer of treatment. Horses that are kept up the year round for farm work should certainly be allowed a nice nibble at grass every day. They work hard, and all they get for it is something to eat. For the Patriot. " LITTLE WILLIE."

"Little Willie," Mother's darling, Full of confidence, and love; Golden years, of youth and manhood, All thy fond affection prove.

" Little Willie," Father's treasure, Firm, courageous, fond and true, Such a blessing, brightening ever, Cheer him all life's journey through. "Little Willie," Sister's playmate,

Fond protector, pet and pride;

Such a guardian, brave and gentle, Walk forever by her side. Bright and beautiful, the garland, Love has woven for thy brow, May the sacred blossoms ever, Breathe a fragrance, pure as now;

Future sorrow, storm and darkness, May obscure thy cloudless way, But the hand of Love will ever Open wide the gates of day.

Bearing thee upon her pinions, Far above the shadows grim, Shedding light upon thy pathway, When thine earthly lamps are dim.

Atlantic, July; 1868.

### LOVE ONE ANOTHER.

Children, do you love each other ? Are you always kind and true? Do you always do to others As you'd have them do to you ! Are you gentle to each other-Are you careful day by day Not to give offence by actions, Nor by anything you say ? Little children, love each other, Never give another pain ; If your brother speak in anger, Answer not in wrath again. Be not selfish to each other, Never spoil another's rest;

## Farmers Department. MIXED STOCK IN PASTURE.

Strive to make each other happy,

And you will yourselves be blest.

I noticed, some time ago, a good deal written about keeping a mixed stock on pastures. As I have been a keeper of stock from very early youth until now, I venture to give my opinion. And first, I have found sheep do very well amongst STATIONERY, &c. cattle, but cattle do badly amongst sheep. To prove it, let the farmer take the fodder left by the cattle, even when part of it has been trodden under their feet, and if the sheep are not fully fed, they will see the sheep eat it up very greedily; then let him take what his sheep leaves and offer it to his cattle, and he will find they won't taste it, if they can get anything else; or let him turn his milch cows in a sheep pasture, and he will find them fail in milk. Cattle do well where horses pasture. In proof of this, every farmer must have seen that cattle will eat the HANCOCK AND GRANITE STS .. horses won't eat what cattle leave, unless Goods, which he will be pleased to make to compelled to do so. But horses and sheep | measure, in the will do well in some pastures, especially the horses. To prove this, let the farmer and warranted satisfactory. Goods sold by turn out the sheep from their yards, turn the vard, and garments cut and trimmed. in his horses, and they will cat up all the sheep have left, even the litter around the racks .- John Johnston.

#### SOAP SUDS.

Save all the suds from the sink and the laundry. If you do not want it for purposes of irrigation, let it be conveyed to CLOTHS, CASSIMERES, DOESKINS your manure heaps or mixed with materials for compost. By mixing it they have a relation to the QUALITY of the artistraw, green vegetable matter, or, indeed the purpose for which it was intended, is DEAR any kind of decomposed rubbish, and allowing the whole to ferment slowly, a \* most excellent fertilizer for Indian corn may be prepared and one that will bring forward the crop with greater vigor than almost any other articles that can be named. It is also very valuable as a manure for culmiferous vegetables-melons, squashes, cucumbers, &c .- Ploughshare, in Germantown Telegraph.

## HORSES' FEET REQUIRE MOISTURE.

Nine-tenths of the diseases which happen to the hoofs and ankles of horses are occasioned by standing on the dry, plank floors of the stable. Many persons seem to think, from the way they keep their &c. horses, that the foot of the horse was never made for moisture, and that, if possible, it would be beneficial if they had cowhide boots to put on every time they went out. Nature designed the foot for moist ground-the earth of the woods and valleys; at the same time that a covering was given to protect it from stones and stumps .- Ohio Farmer.

An exchange says that when a piece of iron is thrown into a trough where chickens drink water they are not affected with chicken cholera. A gentleman who has tried it, says that his chickens are thriving, while those of his neighbors are dying daily. As the chicken cholera is raging to some extent throughout the country, it might be well to try it. Iron will not hurt fowls, and a trial of it might be beneficial.

## Anecdotes.

## IF A HUMBUG.

What a wonder That the doors Are open wide ; Ever since the First of August Thousands have Pain Paint applied. Those who lie Or call it humbug Are the doctors. Not acquaint: For they always
Have been jealous
When their patients
Use Pain Paint.
Pile up facts As high as mountains Before their eyes, But the cfy
Is always humbug,
Men of science
Full of lies.

Pain Paint has been tested, free of cost, Fain Faint has been tested, free of cost, over ten months, every day (except Sundays), at 170 ¡Chatham square, N. Y., for the removal and cure of all manner of jetin and disease. The office is constantly crowded with patients; rain or string. Every person who buys Pain Paint, or tries it free of cost, Ettows that all who call it humbug tell a falsehood.

We want no poison in our lips, No pill to swallow down; We want no burning liniments In City, County, Town.

We want to know the laws of health, We want to shun disease, We want few Doctors' Bills to pay, Or Undertakers' fees. We know all Pills have had their day,

That physic is deceit, The Lancet and the bloody Bowl We never more shall greet, We know our stomachs were not made To drench with Purgatives, Brute instinct shuns the hateful dose And every child that lives.

TREMBLING MAN.—THERE IS A MAN WHOSE hand does not tremble, but handles a brush with dexterity, and lays on the PAINT that never leaves color or stain. He paints girls, boys, men and women, by the hundreds, every day and evening. He removes pain as if by magic, of any name or nature, whether chronic or acute, from a simple mosquito bite to the most frightful cancer. Broken down, trembling patients, are sent by the officers of hospitals to WOLCOFT'S Office. No. 170 Chatham square, N. Y., and all pain is removed for every application, free of expense, without money or price, for the tenant of the sunken cellars of the meanest tenement house, or for the owners of brown stone and TREMBLING MAN -- THERE IS A MAN WHOSE

revery application, free of expense, without money or price, for the tenant of the sunken cellars of the meanest tenement house, or for the owners of brown stone and marble palaces of Fifth Avenue.—All, all are treated alike, and each wait their turn for an application of that wonderful remedy, PAIN PAINT, and all distress, pain, and misery, vanishes instantly, as if commanded by a supernatural agent. The scepter of the kingdom of pain is broken under the touch, of the brush; and crambles like a spider's web, where before it held its victim with an fron grasp for scores of years.

Hundreds of physicians have witnessed the operations with astonishment, and those who expected to scoff and laugh returned to pray. A factory in Brooklyn and the office in New York is driven to its utmost capacity day and night. The Doctor's friends urge him to double the price at once; but the Doctor, with an enaphatic No, settles the matter. The people'shall have it, and every-body else, for 25 cents, 50 cents, \$1, \$3, \$5, and \$8 per bottle, and can select what size they please. Those who are able certainly will purchase the largest sizes, for they contain sixteen of the dollar bottles and hold enough to drive pain headlong, instead of a small bottle that removes pain only by inches.

## Poetry. WAITING FOR THE TIDE

Come down! those shadowed sands invite, And that soft glory on the deep We breathe an atmosphere of light Subtle as dew and calm as sleep.

See, here and there, beyond the foam, A sail is shining like a gem I think the boats are coming nome: We'll linger down and look at them. Not yet: the tide is shy, and stays

By this gray limit of our pier;

It doubts, it trembles, it delays, Yet all the while is stealing near. The boats and we must wait its will; Oh, pleasant patience! they to make While we behold them and lie still) A hundred pictures for our sake.

Oh, happy patience! Not a hue Can flutter through the changing air, Or mould the cloud, or touch the blue, That is not meant for them to wear. And as they watch the glimmering sand That warms the film within the foam,

The tender wave that lifts them home. It comes-they pass-each turning sail Is first a hope and then a bliss; Come back, and dream a fairy tale

That hath a close as sweet as this ?

They know the certain wave at hand-

GRADUATES' SONG.

WORDS BY MISS L. P. COLE. Joyous hours we've spent together, Conning o'er each stated task; Happiest recollections cluster,

As in memory's sun we bask. Time may wither hope's sweet flower-buds, Life bestow more shade than sun; But our motto shall be "Onward,"

God approves of duty done. Though we sever from our classmates, Heart for heart shall still beat warm; We may meet the clouds and darkness, Gathering in affliction's form.

Yet upon our chosen life paths, Where, we trust, the roses lie, Now we enter, there to labor, Till is said our last good-bye.

OBITUARY. Passed away July 17th 1868, John Herrick, aged 18 years, months and 13 days.

Down deep in Mount Auburn's shade, Placed there by loving hands, The body of our darling's laid, His Spirit's in the Summer land. In the Spirit world is a father dear,

"I see the Angels mother." We watched his breathing through the night And heard his moans and cries, We waited for the morning light, With anxious hearts and sighs.

Also a darling brother; While loved ones round him try to cheer,

The morning broke he still was there, His sufferings were not gone; With trembling words expressed his fear, "Oh! do not leave me all alone."

While tears ran down like rain, He expressed a hope he did believe, And said "I'll surely come again." And then again with anxious eye, Looks on the vacant place,

With kindly words his fear relieved.

And loved ones coming from on high, Showed him his father's face. And stretching out his thin white hand, Within that sorrowing home, He gently grasps the spirit hand,

Says " wait father and I'll come.' Oh! Weeping mother, dry your tears, Compose your aching brow, Your darling's gone from pain and fear, He's a bright angel now.

He'll come to you and throw his arms, As he did in times gone by, And feeling free from all alarms, You'll know he's ever nigh.

# FLAT, OR ENGLISH TURNIPS.

All varieties of the English turnip are STATIONERY, &c. propagated from seed, and this should be sown where the plants are expected to remain, as they do not bear transplanting as well as many other plants. For early table use, a few may be sown early. For a winter's supply and for stock, on any vacant land, as after peas, fodder corn, etc., sow from the 1st to the 10th of August. Now and then a good crop is obtained from seed sown as late as the last week in August. They should be BEGS Leave to inform the Citizens of harvested before severe cold weather, that B Quincy and Vicinity, that he has taken is in November. preventive against the attacks of the tur- measure, in tho nip fly. It is said, that as soon as the young plants appear, they should be thoroughly dusted with lime, and the practice continued until the plants are beyond the reach of the fly. It would be well to perform the operation while the dew is on the plants, as the lime would adhere to the leaves more readily. The same treatment is also recommended for currant bushes.

#### FALL PLANTING OF ASPARAGUS.

Within the past two years we have watched experiments made by several gentlemen on planting asparagus in August, and the result is a remarkable suc-cess. The ground is prepared as for the crop at any other season, and after cut- respectfully invited to call. seedlings the roots are set precisely as in seedlings the roots are set precisely as in spring planting. They push new roots cle we buy, and that, which does not answer well symond's Patent Lamps and Petroleum at once, and make eyes so strong that the purpose for which it was intended, is DEAR even from one year old, seedlings some at any price. asparagus-but not, of course very strong -has been cut the following spring, and where two year roots have been used, a full crop has been cut in the same timea result no one expects from spring planting. In this region the plan has taken strong hold of gardeners, and asparagus planting is likely to take rank at once with the strawberry as a regular August operation. It will, of course, be best in such cases to cover the beds, after they have once become frozen, with some kind of litter, not to keep out frost but to prevent thawing and freezing until the natural spring season comes, or the plants may be thrown out .-- Gardener's Monthly.

## CURRANT CUTTINGS.

At a late meeting of the New York lowing directions for managing currant cuttings. Currant wood can be turned into a plant the year it is grown by setting any time from August to November. I would make a square, clean cut, have the ground mellow that the young rootlets may meet with no obstructions, and then push the dirt closely around the bottom of the cutting. The fall is decidedly the best time to commence operations, because in so doing, one gets two years' growth in one. If it is very dry, some mulching will be required, but generally at this season, the ground is warmer than the atmosphere, and ninety-eight per cent.

VALUE OF BONES. "We would rather pay ten dollars a ton for old bones than be without them. IF A HUMBUG,

Are open wide : Ever since the Ever since the
First of August
Thousands have
Pain Paint applied.
Those who lie,
Or call it humbug,
Are the doctors;
Not acquaint:
For they always
Have been jealous
When their patients
Use Pain Paint.
Pile up feets
As high as mountains,
Flash the truth
Before their eyes, Before their eyes, But the cry
Is always humbug,
Men of science
Full of lies.

Pain Paint has been tested, free of cost, over te months, every day (except Sundays), at 170 (Chathas square, N. Y., for the removal and cure of all manner opain and disease. The office is constantly crowded with patients, rain or shine. Every person who buys Paint, or tries it free of cost, knows that all who call humbug tell a falsehood.

We want no poison in our lips, No pill to swallow down; We want no burning liniments In City, County, Town.

We want to know the laws of health. We want to shun disease, We want few Doctors' Bills to pay, Or Undertakers' fees. We know all Pills have had their day,

We know our stomachs were not made To drench with Purgatives, Brute instinct shuns the hateful dose And every child that lives.

That physic is deceit,
The Langet and the bloody Bowl
We never more shall greet.

A Good Assortment

Kept Constantly on hand

You will constantly find at the Citizen's Market all kinds of Meat of the best quality, at the Lowest Cash Prices.

Also, all kinds of Fresh and Smoked Fish, Turnips, Beets, Squashes, Beans of all kinds; Eastern and Sweet Potatoes, Cucumbers, Pickes, Sweet Apples for preserves; Pears, Peaches, Nnts, Citron, Jellies, Bottle Pickles of all kinds; Lemons, Figs, &c.

Also, the very best of White Wine Vinegar. All orders promptly attended to.

And every child that lives.

A TREMBLING MAN.—THERE IS A MAN WHOSE hand does not tremble, but handles a brush with dexterity, and lays on the PAINT that never leaves color or stain. He paints girls, boys, men and women, by the hundreds, every day and evening. He removes pain as if by magic, of any name or mature, whether chronic or acute, from a simple mosquito bite to the most frightful cancer. Broken down, trembling patients, are sent by the officers of hospitals to WollCOFT'S Office. No. 170 Chatham square, N. Y., and all pain is removed for every application, free of expense, without money or role, for the tenant of the sunsen cellars of the meanest tenement house, or for the owners of brown stone and marble palaces of Fifth Avenue.—All, all are treated alike, and each wait their turn for an application of that wonderful remedy, Pain Paint, and all distress, pain, and misery, vanishes instantly, as it commanded by a supernatural agent. The scepter of the kingdom of pain is broken under the touch, of the brush, and crumbles like a spider's web, where before it held its victim with an iron grasp for scores of years.

It is needless for us to state the success he has already achieved in the sale of his old standard remedy, the ANNIHILATOR, universally patronized for catarrh and colds in the head, which is to day the only leading and reliable remedy for that loathsome yet universal complaint. Still more, he now puts up the ANNIHILATOR in pluts instead of half pints, and makes it one-quarter stronger and more efficient. He has cared, by the use of this valuable medicine, not only thousands of almost hopeless cases of catarrh, but hundreds of weak nerves. Hundreds of physicians have witnessed the operations with astonishment, and those who expected to scoff and laugh returned to pray. A factory in Brooklyn and the office in New York is driven to its utmost capacity day and night. The Doctor's friends urge him to double the price at once; but the Doctor, with an emphatic No, settles the matter. The people shall have it, and everybody else, for 25 cents, 50 cents, \$1, \$3, \$5, and \$5 per bottle, and can select what size they please. Those who are able certainly will purchase the targest sizes, for they contain sixteen of the dollar bottles and hold enough to drive pain headlong, instead of a small bottle that removes pain only by inches.

Dr. WOLGOTT is a man of business. He has been in the same office nearly six years, and tolks know just where to find him. He has no time to visit race courses or base ball matchess—hardly time to snatch a lunch.—People of common sense know that he means just what he says, He has too much honor to make a single false statement.

JOY.

Joy dwells not in external things, It hath an inner birth ; The sweetest bird in darkness sings, And fairest flowers oft nurture stings, Such is our life on carth.

Then measure not by outward show The depth of real joy; The heart can o'er the darkest woe A stream of sunlight softly throw, Or purest bliss destroy.

#### Karmers' Department. SHOULD THE PATENT LAWS BE EX TENDED TO HORTICULTURE.

Under the above caption The Horticulturist discusses the value of the Patent Laws and suggests an extension of their benefits so that they may do for the farmer, the florist, and the horticulturist what they have already done for the mechanic. Our cetemporary says, let there be, in connection with the Agricultural Bureau, an office of record, where the name, char- STATIONERY, &c. acter, quality, description, etc., of new varieties of fruit and grain, originating in this country, shall be entered and secured to the originator. Let specimens be sent to trustworthy correspondents of the bureau in various sections of the country, so that its value for general cultivation may be determined. Let the result thus arrived at be publicly announced under authority of the bureau, and the right to vend the article be vested in the originator and his licenses for a term of years. Something of this kind would wonderfully profit of the country. While it would measure, in the secure to the originator the just reward of his skill and labor, it would protect and warranted satisfactory. Goods sold by the public from the thousand impositions the vard, and garments cut and trimmed. now put upon them by the venders of new varieties of untried and doubtful value. As this business is now conducted, we have no hesitation in asserting that many thousands of dollars are annually thrown away in the purchase and planting of fruits, for example, which, Merchant Tailor & Dealer however valuable they may have proved in their original locality, are totally un- CLOTHS, CASSIMERES, DOESKINS profitable and useless for cultivation in other sections under an altered condition of soil and climate.

These being sent out at extortionate prices, for general cultivation, and failing to answer the expectations excited by the glowing descriptions published of their merits, tend to discourage cultivators and bring the profession of Horticulture into disrepute. Were some such system adopted as we have suggested, however, the honest experimenter would be protected in the product of his labor, and the prices of new plants would be set at a mere reasonable figure, so as to be within the reach of all, because the originator would, instead of, as now, being enjoyment for a term of years.

We know it may be urged that such a hold. corporated into the Patent Laws of any nation; but of its necessity, its justice there can be no question. As the United NEW ENGLAND NOVELTY CO., States, by its greater liberality to inventors, has stimulated the arts and sciences, and added to the industrial wealth and resources of the people more than any other government in the world, let it go one step farther and by judicious legislation, stimulate the husbandman to take rank among the highest order of productive agents, and elevate and dignify that profession which, however much lauded THE Subscriber having taken the new Shop, by poets and extolled by politicians as an ennobling one, has heretofore been of the earth, quite too earthy .- Scientific Amer-

NEW ADVERTISEMENTS.

IF A HUMBUG. What a wonder
That the doors
Are open wide;
Ever since the
First of August
Thousands have
Pain Paint applied.
Those who lie,
Or call it humbug,
Are the doctors, Not acquaint:
For they always
Have been jealous
When their patients
Use Pain Paint. The up facts

As high as mountains,
Fisah the truth
Before their eyes,
But the cry
Is always humbug,
Men of science
Full of lies.

Patented Aug. 29th, 1854; June 5th, 1866; June 18th, 1867; Dec. 24th, 1867.

Pain Paint has been tested, free of cost, over to months, every day (except Sundays), at 170 (Chathas square, N. Y., for the removal and cure of all manner pain and disease. The office is constantly crowded with the constant of the constant patients, rain or shine. Every person who bugs Pair Paint, or tries it free of cost, knows that all who call i humbug tell a falschood.

We want no poison in our lips, No pill to swallow down; We want no burning liniments In City, County, Town. We want to know the laws of health, We want to shun disease, We want few Doctors' Bills to pay, Or Undertakers' fees.

It is needless for us to state the success he has already It is needless for us to state the success he has already achieved in the sale of his old standard remedy, the ANNIHILATOR, universally patronized for catarrh and colds in the head, which is to day the only leading and reliable remedy for that loathsome yet universal complaint. Still more, he now puts up the ANNIHILATOR in pints instead of half pints, and makes it one-quarter stronger and more efficient. He has cured, by the use of this valuable medicine, not only thousands of almost hopeless cases of catarrh, but hundreds of weak nerves. Many a man whose hands trembled to such a degree, that it was impossible to read a newspaper without laying it on a desk, and who could scarcely write their name it on a desk, and who could scarcely write their name once a week, find immediate benefit. Poetrn. LOOKING BACK?

Written by Lady Nairn, in her 75th year.

Would you be young again ? So would not !-One tear to memory given, Onward I'd hie. Life's dark flood forded o'er-All but a rest on shore-Say, would you plunge once more, With home so nigh ?

If you might, would you now Retrace your way ? Wander through stormy wilds, Faint and astray ? Night's gloomy watches spread, Morning all beaming red, Hope's smiles around us shed, Heavenward-away.

Where, then, are those dear ones, Our joy and delight? Dear and more dear, though now Hidden from sight. Where they rejoice to be There is the land for me : Fly, time-fly speedily ! Come, life and light !

INTERESTING TO OLD PEOPLE. The following course of procedure will enable them to preserve the eye-sight, or recover it after it has failed :- Every morning, when washing yourself, dip your face into the water as long as your breath. This strengthens the eye and cleanses it from the rheum which deadens the sight, and considerably affects the ball. A gentleman in Maryland, by the name of James Calder, after using specticles for twenty-five years, followed this plan, and at the age of seventy, recovered his sight so as to see without them. Dipping the crown of the head into cold water every morning, both winter and summer, is a preservative against the head and ear ache,

MODERN MATRIMONY. George Francis Train says our Modern marriage service should be read thus :- "Clergyman -Will you take this brown stone, this carriage and span, these diamonds, for thy wedded husband? Yes. Will you take this unpaid milliner's bill, this high waterfall of foreign hair, these affectation accomplishments and feeble constitution, for thy wedded wife? Yes. For the Potriot. TRAVELLING FOR HEALTH-No. 2.

BY PROF. W. M. CORNELL, M. D.

It is very customary now for a parish to allow their minister to be absent a number of months, for the benefit of his health; and to fornish him with the means for travelling abroad. We commend such for their kindness and charity.

It manifests a good feeling towards their minister, and shows that, after having received of him " spiritual blessings," they are willing he should partake of their

" carnal things." We would suggest a different course both for the parish and for the enfeebled minister. One which we believe, would better improve his health and more " abound to the riches of their liberality." It is to furnish him with land for tillage, and with the implements of husbandry. It need not be a tifteen thousand, or even a six thousand dollars farm, such as the papers inform us have been supplied to two of the pastors in Brooklyn in New York. A very small farm, or even a garden, would be sufficient. There let the minister, worn down by the cares, labor and anxiety attendant upon professional duty, breathe the pure air of heaven and exercise his bodily powers. Let him lay hold of the hoe, the axe, the plough, the seythe and the rake, and take gentle, daily exercise. Let him not fear the loss of a delicate hand, or a lily-like face, or a slender arm. In " the labor of his hands" let him rejoice, and in " the sweat

can say, " these hands have ministered to my necessities." Agriculture and horticulture are among the best means to restore declining health and rejuvenate the exhausted and jaded mind. The benefit of such employment has been sung by poets and proised by

not worth being a villian for. What matter if your neighbor lies in a splendid tomb? Sleep you with innocence. Look behind you through the track of time. A vast desert lies open in retrospect; wearied with years and sorrow, they sink from the walks of man. You are to leave them where they fall; and you must go a little further, and you will find eternal rest. Whatever you may have to encounter between the cradle and the grave, every moment is big with events, which come not in succession, but bursting forcible from a revealing and unknown cause, fly over this orb with diversified

politics; some advise us to pitch into sinners, others doubt the propriety of Satan rebuking sin ; some advise us to ventinot throw stones; some advise us to print stories, others think we had better stick to truths; some say that if we would keep certain articles out of the paper, it would double our circulation, others think if we would print more of the sort it would double; those who have personal contests think we are stupid if we do not get angry and pitch into their opponents, and their for not siding with them. We have not found a single adviser who could not in his own estimation, edit a paper much better than we do; have a much larger better than we do; have a 25 50 circulation, make more money, have more less 'Born to no Master, of no Sect are We.'

PIC-NIC. The annual festival of the St. John's and St. Mary's Sunday Schools, of this town, came off in fine style, at Abington Grove, on Tuesday last. The Schools, for whose especial benefit the arrangements were made, turned out in good numbers, and made a very handsome appearance, as they marched, escorted by the Quincy Band, from the Chapel to the Depot. At 9 1-2, A. M., the cars came up, and a company of about three hundred stepped on board, and amid the waving of handkerchiefs and music, started on their way to the pleasure ground. The cheerful looks which they brought home with them, showed that they had passed a pleasant day.

The Band, which appeared in their new uniform (of which we have not before had an opportunity to speak, -has, in its organization, some of the choicest and best musical talent, and is an efficient musical corps.) discoursed some of it choicest strains, which, as usual, left a most agreeable impression. This Associ ation our citizens have just reason to be proud of. They have struggled through much to reach their present eminent position -having lately been to considerable expense for a new and more fashionable outfit,-looking for no remuneration except the public favor,-which it is our duty as well as interest on all occasions cheerfully to render them, that they may be encouraged to go on and increase their usefulness in their profession.

QUINCY HORSE RAILROAD PROPERTY FOR SALE. We see by an advertisement in a Boston paper, that all the property belonging to the Quincy Horse Railroad, iron, rails, ears, sleighs, etc., are offered for sale, at a bargain. We had much rather that they would let them remainand that some efficient man, or company of men, would step forward and put the road in running order again-say from Quincy Square to some connecting point with the Dorchester road. They would receive the thanks as well as the blessings of the community; for it is a desideratum much desired, and a want much needed, especially by those who live on the line of the road-and an undertaking, with proper management, that we should think would pay well.

LICENSES. We learn from the Dedthis County have received seventy-seven applications under the present License law, and from twelve different towns, and that they have as yet granted but twentyfive licenses-ten to innholders, nine to apothecaries and six to grocers. It is not probable, from present indications, that the whole number granted in the County will exceed one to a town, of the medium class.

DEATH OF HON. THADDEUS STEVENS. Hon. Thaddeus Stevens, of Pennsylvania, died in Washington on Tuesday night last, at the age of seventy-five. Mr. Stevens has long been in feeble health, and nothing but his indomitable energy enabled him to perform his duties as a member of the House of Representatives. Mr. Stevens was a man of remarkable force of character, very fixed in his views and ardent and persevering in their prosecution. He was always on the side of freedom and the abolition of slavery, and during the war was in favor of the most vigorous policy in its prosecution. For years he has been recognized as one of the leaders of the Republican majority in Congress; some of the most important measures in the history of the party were originated by him. His last most important work was as a member of the impeachment managers in the trial of Andrew Johnson, and his forcible and pithy speech on the subject will long be remembered. Mr. Stevens' persistent character made him many political enemies, but now that he has died at the post of duty, there are few who will not acknowledge that, in spite of some errors, he was a man who did great service for his country, and is worthy of being ranked high among the list of

Out on the Porch, by the open door, Sweet with roses and cool with shade, Baby is creeping over the floor,-Dear little winsome blue eyed maid !

All about her the shadows dance, All above her the roses swing, Sunbeams in the lattice glance, Robins up in the branches sing.

Up at the blossoms her fingers reach, Lisping her pleading in broken words, Cooing away in her tender speech, Songs like the twitter of nestling birds.

Creeping, creeping over the floor, Soon my birdie will find her wings, Fluttering out at the open door, Into the wonderful world of things.

## Farmers Department. CONDITION OF THE CROPS.

In the Monthly Report of the Agricultural Department, at Washington, of the "Condition of the Crops for July," we find the following statements:-

CORN. The most remarkable fact in connection with the corn crop of the present year is the great increase of its acreage in the South, the difference in number of acres between the present and preceding year being more than two millions and a half. A slight decrease is apparent in the eastern seaboard States, resulting from the unpropitious character of the recent cold, wet, and backward spring, which sadly interfered with plant- | Quincy and Vicinity, that he has taken ing. A careful estimate of the acreage the store, at the corner of shows a decrease of 49,609 acres in eight HANCOCK AND GRANITE STS. States, and an increase of 3,108,215 acres in the remaining States. Total number of acres planted to corn in the United measure, in the States, is about thirty-six millions, an advance of nine per cent.

somewhat the growth of corn, but its condition in that section is generally good. In the west the average is high, with the exception of Ohio and Indiana, where the weather has been somewhat unpropitious, and storms destructive. In the east, on the last of June, the growth was small, Merchant Tailor & Dealer but the hot weather of July has brought a large portion of the crop into splendid con-

With a Quincy, March 30 successful harvesting of the spring wheat it may safely be declared, in summing up the local reports, that a larger number of bushels of wheat, by many thousands, will be grown in the United States in 1868 than in any previous season.

COTTON. Returns from the cotton districts indicate everywhere a reduction of the acreage in that crop with the exception of Texas, which shows an increase of 33 per cent. over last year, and Alabama, where there appears to be no material change in the figures. The average reduction in acreage is about 10 per cent. With this diminished breadth there is cleaner and better culture and a more general use of fertilizers, so that the

## Anecdotes.

A very corpulent gentleman, traveling in Minnesota, was walking backward and forward in front of a tavern while the horses were changing. One of the gapers, Family Groceries, an inhabitant of the place, had a mind to be witty; viewing the gentleman's person,

IF A HUMBUG. What a wonder That the doors Are open wide ; Ever since the First of August

Thousands have Pain Paint applied. Those who lie, Or call it humbug, are the doctors Not acquaint : For they always Have been jealous
When their patients
Use Pain Paint.
Pile up facts
As high as mountains, But the cry le always humbug, Men of science Full of lies.

Pain Paint has been tested, free of cost, months, every day (except Sundays), at 170 Chatham square, N. Y., for the removal and cure of all masmer of pain and disease. The office is constantly crowded with patients, rain or shine. Every person who buys Pain Paint, or tries it free of cost, knows that all who call it numbug tell a falsehood,

We want no poison in our lips, No pill to swallow down; We want no burning liniments In City, County, Town.

We want to know the laws of health, We want to shun disease, We want few Doctors' Bills to pay, Or Undertakers' fees.

That physic is deseit, The lancet and the bloody Bowl We never more shall greet, We know our stomachs were not made To drench with Purgatives, Brute instinct shuns the hateful dose And every child that lives.

Marchandise at extremely low prices.

Call and see for yourselves.

ALE!

ALE! TREMBLING MAN -- THERE IS A MAN WHOSE tenement house, or for the owners of brown stone and marble palaces of Fish Avenue -- All, all are treated

It is needless for us to state the success he has already achieved in the sale of his old standars remedy, the ANNIHILATOR, universally patronized for catarrh and colds in the head, which is to day the only leading and reliable remedy for that loathsome yet universal com aint. Still more, he now puts up the AN in pints instead of half pints, and makes it one-quarter stronger and more efficient. He has cured, by the use of this valuable medicine, not only thousands of almost hopeless cases of catarih, but hundreds of weak nerves. Many a man whose hands trembled to such a degree, Kept Constantly on hand

You will constantly find at the Citizen's Market all kinds of Meat of the best quality, at the Lowest Cash Prices.

Amay a man whose hands trembled to such a degree, that it was impossible to read a Lewspaper without laying it on a desk, and who could scarcely write their name once a week, find immediate benefit. Fint bottles hold three of the smaller size. Thousands suffer who would be wholly restored from that disgusting disease, CA-TARRH, which lends directly to lung complaints, dysarthe Lowest Cash Prices. pepsia, weak nerves pain in the side and stomoch, and liver complaint. Doctors in general do not understand Catarrh, and few are bold enough to deny it. Nothing ever taken into the stomach can cure it, for the disease in the head. You might as well put a pluster on the foot to cure an ulcer on the hand .-- Catarrh is an ulceration in the head and a running sore; the matter falls in the throand clogs it; at night runs down to the stomach and un-dermines the whole constitution.

Catarrh snuff will always produce catarrh and aggra-

vate the disease. A sneeze is nature's most emphatic No, and dust of any kind is most positively injurious. You must cure the lestering uleer in the head and the difficulty in the throat and stomach, from this load of phlegm constantly pouring from the head, is removed. It must be cleaned out, instead of adding snuff and more filth. Buy none of the Doctors' remedies unless in pure white wrappers.

marble palaces of Fish Avenue.—All, all are treated alike, and each wait their turn for an application of that wonderful remedy, PAIN PAINT, and all distress, pain, and misery, vanishes instantly, as if commanded by a supernatural agent. The scepter of the kingdom of pain is broken under the touch, of the brush, and crumbles like a spider's web, where before it held its victim with an iron grasp for scores of years.

Hundreds of physicians have witnessed the operations with astonishment, and those who espected to scoff and laugh returned to pray. A factory in Brooklyn and the office in New York is driven to its utmost capacity day and night. The Doctor's triends urge him to double the price at once; but the Doctor, with an emphatic No, settles the matter. The people shall have it, and everybody else, for 25 cents, 50 cents, \$1, \$3, \$5, and \$5 per bottle, and can select what size they please. Those who are able certainly will purchase the largest sizes, for they contain sixteen of the dollar bottles and hold enough to drive pain headlong, instead of a small bottle that removes pain only by inches.

Poetry. THE SPIRIT EXPRESSION.

The spirit expression of Daniel Web-Steamer Rose Standish, ster, given through the organism of Mrs. utes-an unusual occurrence for us-Emily A. Newcomb, of this town, July when she suddenly broke out into one of 19th, 1868: The Angel world around you lies,

> While they sing in tones of love, Of this Heavenly home above, They bid you come through open gate,

To enter in the lumble state; Peace with magic wand invites, Love and Beauty there unites.

United powers with them combine, Truth uplifted then shall shine.

The Angels come, through us to day,

The sacred presence of your dead. Ascended now with gifts they come, To bear your spirits upward home;

For every duty that's well done. God the centre of your lives, Bears you upward through all strife; Come then, hear the angels call,-

Come, we want you one and all. In the work that is begun, Church and State their course has run;

Know you that from storm and strife, Comes the knowledge of true life; Right and Justice the State-boat steer, You have nothing more to fear.

Hundreds of physicians have witnessed the operativith astonishment, and those who expected to scoff with astonishment, and those who espected to soff and laugh returned to pray. A factory in Brooklyn and the office in New York is driven to its utmost capacity day and night. The Doctor's friends urge him to double the price at once; but the Doctor, with an emphatic No, settles the matter. The people shall have it, and everybody clse, for 25 cents, 50 cents, \$1, \$3, \$5, and \$8 per bottle, and can select what size they please. Those who are able certainly will purchase the largest sizes, for they contain sixteen of the dollar bottles and hold enough to drive nain heading, instead of a small bottle that re-

It is needless for us to state the success he has already achieved in the sale of his old standard remedy, the ANNIHILATOR, universally patronized for catarrh and colds in the head, which is to day the only leading and reliable remedy for that loathsome yet universal complaint. Still more, he now puts up the ANNIHILATOR in pints instead of half pints, and makes it one-quarter stronger and more efficient. He has cared, by the use of this valuable medicine, not only thousands of almost hopeless cases of catarrh, but hundreds of weak nerves. Many a man whose hands trembled to such a degree, that it was impossible to read a newspaper without laying it on a desk, and who could scarcely write their name once a week, find immediate benefit. Pint bottles hold three of the 50 cent bottles, and he sells fifty pint bottles to one of the smaller size. Thousands suffer who would be wholly restored from that disgusting disease, CATARRH, which leads directly to lung complaints, dyspepsia, weak nerves, pain in the side and stomoch, and the complaint. Doctors in general do not understand Catarrh, and few are bold enough to deny it. Nothing ever taken into the stomach can cure it, for the disease in the band. You might as well have a latter as the foot to cure head. You might as well put a plaster on the foot to cure an ulcer on the hand.—Catarrh is an ulceration in the head and a running sore; the matter falls in the throat and clogs it; at night runs down to the stomach and undermines the whole constitution and clogs it; at night runs down to the stomach and undermines the whole constitution.

Organs are in perfect health? You never hear such men complain of being melancholy, of nervousness, of palpitation of the heart. They are never afraid they cannot succeed in business; they don't become sad and discouraged; they are always polite and pleasant in the company of ladies, and look you and them right in the face—none of your downcast looks or any other meanness about them. I do not mean those who keep the organs inflated by running to excess. These will not only ruin their constitutions, but also those they do business with or for. How many men, from badly curred die cases, from the effects of self-abuse and excesses, have brought about that

THE MEADOW PATH. It leads, in many a tangled curve, Through reedy fen and yielding mosses, To where, through rushes rank and green, On stepping-stones the brook it crosses;

It circles in and circles out, By ferny fell and wooded passes, And hides away, in sudden sport, Beneath the lush and tangled grasses.

It skirts the upland's shallow pool With many a graceful scoop and hollow, And runs away, on bare brown feet, The faster, as you faster follow ! It sweeps along the fallow ridge, In countless eddying curves and narrows, And, swooping in and swooping out, It frights the wee brown-breasted sparrows.

It flits away, with dainty grace, Through spongy marsh and sandy shallows, And dons the cardinal's gay bood, To brighten up its barren fallows It braids the king-cup's golden bells, Like stars, amid its floating tresses, And, circling in and circling out, It dies at last among its cresses,

where evaporation is least active. "All varieties of grapes having downy foliage are more subject to this form of mildew than are those with smooth and shining leaves.

"The second general form of mildew is that seen on the upper surface of the leaves, giving them an appearance similar to having been dusted with fine flour, and which may be brushed off without any apparent marks of injury. Occasionally this will be observed on the berries in early summer, and may have some connection with the rot.

"Its effects are those of retarding growth, and the fruit, and even young shoots, in extreme cases, crack open, as is seen in the cracking of the fruit of

some varieties of the pear.
"The debilitating effects of dry air and dry soil seem to render vegetation liable to its attacks, and favorable to its extension. This form of mildew is less frequent and not so injurious on the native species of grape as that previously mentioned, and when treating on preventives the first described form will be more particularly kept in view. The rot in the berry is, perhaps, the most fatal disease in the grape, and one whose origin is yet obscure. It is undoubtedly a fungoid growth, from which fact we may deduce its origin to a disorganization of the plant, a weakened vitality, proceeding from one or various causes, either immediate or remote from its appearance.

I purposely refrain from enumerating any of the many theories that have been promulgated regarding this disease, further than to mention that it has been noted that where it does exist, it is most persistent and fatal on plants growing in soils rich in organic matter, showing that a condition favorable to luxuriant growth of plant is favorable to the extension of this disease.

"It is also well known that, in the "It is also well known that, in the case of foreign grapes grown in glass BEGS Leave to inform the Citizens of Quincy and Vicinity, that he has taken structures, where all the circumstances the store, at the corner of of culture are in a great degree artificial, the rot is prevented in varieties subject to that disease by withholding water during and has a large assortment of choice Woolen the period of swelling and ripening of the measure, in the

"The only preventives known are those of shelter from heavy dews or rains, either by mechanical or natural appliances, and applications of sulphur and other antidotes to the foliage. Experiments have proved that leaf blights may be prevented by sheltering the foliage. How far expedients for this purpose can be profitably employed is a question for grape-growers to decide. Poetry.

Written on the death of MRS. ANGELINE A. SOULE.

Mourning friends, why grieve you so, O'er the death of her you loved ? Know you not that she has gone, To a better home above.

Long she struggled with disease, Hoping that relief might come, But there was no balm to heal, For her work on earth was done. But now her sufferings all are o'er, And she is freed frum pain; She knows, that what is less to you,

Is her eternal gain. She's found a home in Heaven, That far surpasses this, Where peace forever reigns, And perfect happiness.

And when your work is done,

You too will pass away, To join the friends that's gone, To those realms of endless day Then do not wish her back, To this cold and heartless world,

Where sickness, pain, and anguish Are forever at us hurled. There is a friend in Heaven, Who can heal your wounded hearts; If you go to him in faith,

He will the balm impart. Fare well Mother, now I leave thee, Earth to me is dark and drear ; When I gain those Heavenly mansions, I will come thy hearts to cheer.

She through weary months did languish, Wasting slowly day by day, And we saw the angels coming, Beckoning her soul away.

Yes, weeping parents it is well,-You know that God is love, That love exceeding thine has called Thy cherished one above. Farewell; dear Ange, now farewell,

And peaceful be thy rest; We would not call the back again, Who art so early blest.

DURING the month of August we shall offer our entire stock of SUMMER GOODS at extremely low prices, to close them out this sea-Oh, weeping mother, dry your tears, Compose your aching brow, Your darling's gone from pain and fears, She's a bright angel now.

Boston, Apr. 11th, 1868:

All shimmering in the morning shine And diamond with dew, And quivering in the scented wind That thrills its green heart through,-The little field, the smiling field,

With all its flowers a-blowing,

How happy looks the golden field The day before the mowing ! All still 'meath the departing light, Twilight, though void of stars, Save where, low westering, Venus hides From the red eye of Mars ;

How quiet lies the silent field With all its beauties blowing; Just stirring-like a child asleep,-The night before the mowing. Sharp steel, inevitable hand,

Cut keen, cut kind! Our field We know full well must be laid low Before its wealth it yield : Labor and mirth and plenty blest Its blameless death bestowing : And yet we weep, and yet we weep, The night before the mowing.

### Karmers Department. BUTTER MAKING.

It is as easy to make sweet butter as that which is rank and offensive. Sweet cream and ordinary care in the processes of churning, working, and packing can produce but one result-good butter. One common fault is keeping the cream too long, for the sake of accumulating, sufficient quantity for a "big churning. Another is in raising the cream in a place where offensive exhalations or otherwise temperature for churning. Clean pans, measure, in tho pails, tubs, etc., are absolutely necessary one pound of butter is ample.—Scientific and warranted satisfactory. Goods sold by

MANAGEMENT OF SICK ANIMALS. A correspondent of the Germantown Telegraph is of the opinion that more farm stock is lost or injured by hasty and illposed ailments, than by a failure to adminster anything for the purpose of cure. The Cranberry Crop on Cape Cod. A meeting of the Cranberry growers was held at Harwich on Tuesday last, at which it was reported from almost every section of the Cape that the present crop of cranberries would be much less than last year. A few exceptions however were mentioned. The cause of the short crop was generally conceded to be in consequence of the abundance of water and the cold and backward spring.

Now reader, self-abuse, venereal diseases badly cured, and sexual excesses, are all capable of producing a weak ness of the generative organs. The organs of generation, when in perfect health, make the man. Did you ever think that those bold, defiant, energetic, persevering, successful business-men are always those whose generative organs are in perfect health? You never hear such men complain of being m-lancholy, of nervousness, of palpitation of the heart. They are never afraid they cannot succeed in business; they don't become sad and discouraged; they are always polite and pleasant in the company of ladies, and look you and them right in the face—none of your downcast looks or any other meanness about them. I do not mean those who keep the organs inflated by running to excess. These will not only rulu their constitutions, but also those they do business with or for. > "She sleeps; Her smile bath passed away, As dies a ripple on the sea."

We watched her breathing through the night Her breathing soft and low, As on her breast the wave of life

Kept heaving to and fro. So silently we seemed to speak, So slowly moved about, As we had lent her half our powers To eke her being out.

Our very hopes belied our fears, Our fears our hopes belied; We thought her dying when she slept, And sleeping when she died.

For when the morn came, dim and sad, And chill with early showers, Her quiet eyelids closed ;-she had Another morn than ours

HUNTING FOR THE COWS.

Many of our farmers have wasted years of valuable time, just because they did not teach their cows to come home at night. Any one who has ever lived or traveled in the country, will remember the familiar Co-bos, of the farmer's son or hired man as they endeavor to coax the cows from the woods, or the tall grass in the great pasture. We have had a little experience in these matters, and well remember how we have waded through the brush and bogs looking for the cows, and, boy like, we thought them dreadful contrary animals. But we have lived long enough to learn better, and now think enough to learn better, and now think that the biped was the more contrary animal of the two. Boys, we will tell you a secret that will save you a great deal of trouble, and it is this: Just sow home the secret that will save you a great deal of trouble, and it is this: Just sow home the secret that will save you a great deal of trouble, and it is this: Just sow home the secret that will save you a great paint, or tries it free of cost, knows that all who call it has been tested, free of cost, over ten months, every day (except Sandays), at 170 Chatham square, N. Besides this they will give more milk, and forget to kick over the milk pail, even if you do whistle a little too loud.

Summer Pruning of the Grape Vine.

that which directs the severe and continual pruning of the grape vine. Leaves are the lungs of the plants through the stomata or porces of which they receive the life-giving oxygen of the atmosphere and expel the azote or deadly exhausted air. We cannot improve the health of any thing by cutting out a part of its lungs. We do not advocate the too liberal use of the knife, or of the finger and thumb, but as superabundant wood delays the maturation of the fruit and diminishes its size, we should have as little extra its size, we should have as little extra wood as possible; and as the vine must be kept within certain limits, it is better to prevent the growth of shoots by rub-ling off all the superfluous hads then to be in the bottor's friends urge him to double the part of the bottor, with an emphatic No, settles the matter. BE CAREFUL WHAT MEDICINES. YOU TAKE.

HEN you are exhausted by over-work of head or hand, and feel the need of something invigorating, don't drink whiskey nor any intoxicating thing, whether under the name of Bitters or otherwise. Such articles give just as much strength to your weary body and mird as the whip gives to the jaded horse, and no more. Alcoholic stimulants are injurious to Nerve-health, and are ALWAYS followed by DEPRESSING REACTION.

Dodd's Nervine and Invigorator is a TONIC and GENTLE STIMULANT which is NOT attended by REACTION. What it gains for you it maintains. When it refreshes body or mind, it refreshes with natural strength that comes to stay. We are not recommending tectotalism in the interest of any faction; but long and extended observation teaches us that he who resorts to the Bottle for rest or recuperation, will find, as he keeps at it, that he is kindling a fire in his bones which will consume like the flames of perdition. Turn from it. will consume like the flames of perdition. Turn from it. Take a tonic that will refresh and not destroy. Dodd's Nervme is for sale by all Druggists. Price One Bollar. IF A HUMBUG.

What a wonder That the doors Are open wide; Ever since the First of August Thousands have Pain Paint applied. Those who lie, Or call it humbug, Are the doctors, Are the doctors,
Not acquaint:
For they always
Have been jealous
When their patients
Use Pain Paint.
Pile up facts
As high as mountains,
Flash the truth
Before their eyes,
But the cry But the cry Is always humbug, Men of science Full of lies.

We want no poison in our lips, No pill to swallow down; We want no burning liniments In Caty, County, Town.

We want to know the laws of health, We want to shun disease, We want few Doctors' Bills to pay, Or Undertakers' fees.

We know all Pills have had their day, That physic is deceit,
The Lancet and the bloody Bowl
We never more shall greet,

We know our stomachs were not made To drench with Purgatives, Brute instinct shuns the hateful dose And every child that lives.

It is said that some laws are henored more in the breach than the observance, and it is probable that one of these is that which directs the severe and continued as the severe and the severe and continued as the severe and the severe and continued as the severe and the severe and the severe and continued as the severe and continued as the severe and the severe severe and the sever

HYMN OF FORBEARANCE. Oh! living were a bitter thing,

A riddle without reasons, If each sat lonely, gathering Within his own heart's narrow ring The hopes and fears encumbering The flight of earthly seasons. Thank God that in Life's little day,

Between our dawn and setting, We have kind deeds to give away, Sad hearts for which our own may pray, And strength, when we are wronged, to stay Forgiving and forgetting ! Thank God for other feet that be By ours in life's wayfaring; For blessed Christian Charity,

Enduring and forbearing! We all are travellers, who throng A thorny road together; And if some pilgrim not so strong As I, but sore-foot, does me wrong-I'll make excuse ; the road is long,

Believing good she cannot see,

Suffering her friend's infirmity-

And stormy is the weather. What comfort will it yield the day Whose light shall find us dying, To know that once we had our way Against a child of weaker clay, And bought our triumph in the fray

With purchase of his sighing?

Most like our Lord are they who bear Like him long with the sinning : The music of long-suffering prayer Brings angels down God's golden stair, Like those through Olivet's darkened air, Who saw our life beginning.

Now reader, self-abuse, venereal diseases badly currently and sexual excesses, are all capable of producing a weak ness of the generative organs. The organs of generation, when in perfect health, make the man. Did you ever think that those bold, defiant, energetic, persevering, successful business men are always those whose generative caseful business men are always those whose generative caseful business men are always the generative caseful cessful business-men are always those whose generative organs are in perfect health? You never hear such men complain of being melancholy, of nervousness, of palpitation of the heart. They are never afraid they cannot succeed in business; they don't become sad and discouraged; they are always polite and pleasant in the company of ladies, and look you and them right in the face—none of your downcast looks or any other meanness about them. I do not mean those who keep the organs inflated by running to excess. These will not only ruin their constitutions, but also those they do business with or for.

How many men, from badly cured di-cases, from the How many men, from badly cured di-cases, from the ffects of self-abuse and excess s, have brought about that In this town, on the 30th ult., by the state of weakness in those organs that has reduced the disease—idiocy, lunacy, paralysis, spinal affections, sui-cide, and almost every other form of disease which humanity is heir to, and the real cause of the trouble scarcely ever suspected, and have doctored for all but the

right one.
Diseases of these organs require the use of a Diuretic.
HELMBOLD'S FLUID EXTRACT BUCHU is the great Diagretic, and is a certain cure for diseases of the Bladder, Kidheys, Gravel, Dropsy, Organic Weakness, Female Complaints, General Debility, and all diseases of the Urinary Organs, whether existing in Male or Female, from shatever cause originating, and no matter of how long standing.

If no treatment is submitted to, Consumption or Insanity may ensue. Our flesh and blood are supported from these sources, and the health and happiness, and that of Posterity, depends upon prompt use of a reliable

remedy.

## Moetrn. BAREFCOTED BOY.

Blessings on the little man, Barefoot boy with cheeks of tan ; With thy turned up panta'oons, And thy merry whistled tunes, With thy red lip, redder still, Kissed by strawberries on the hill; With the sunshine on thy face, Through thy torn brim's jaunty grace From my heart I give thee joy-I was once a barefoot boy ! Prince thou art-the grown up man Only is Republican. Let the million-dollard ride : Barefoot trudging at his side, Thou hast more than he can buy, In the reach of ear and eye-Outward sunshine, inward joy-Blessings on thee, barefoot boy !-

## Farmers Department.

[From the Rural New Yorker.] BERRIES IN THE N. Y. MARKET.

I presume your readers are aware that the raspberry immediately succeeds the strawberry, and for once the crop was not marketable until the strawberries were. all out of the way. When they did come there was a strong demand for them, and the first arrivals of Antwerps sold at 75 cts. per quart. This variety has been very scarce the entire season; in fact, as a crop, it has been considered a failure, and consequently it has sold very high. I think the price will average 45 cts. per quart during the entire sea-

Some very fine Clark Raspberries were received and sold readily at 68 ets per quart. They carried well. The Philadelphia was more plenty, but sold for about 25 cts. per quart. These berries do not bear transportation as well as square, N. Y., for the removal and cure of all manner of pain and disease. The office is constantly crowded with either of the above, and the fruit being patients, rain or shine. Every person who buys Pain and warranted satisfactory. Gooseberries have also been very scarce and high; beginning at \$4, the prices ran up to\$6 per bushel, where they remained until the close of the season. This berry is used in large quantites by pie bakers.

Currants were not an exception to the general rule of light crops; in fact, there never has been such a small quantity of them received in our market. The price at the start was 12 cts., and they reached And every child that lives.

This I do as follows: I make a strap long enough to pass around the foot, close down to the heel of the shoe, with the buckle in front. Through the part of the strap which comes on the frog I drive outwardly, four or six sharp nails, which should stick through at least half an inch. I then stitch another piece of leather over the heads of the nails to keep them firmly in place. With this spur snugly buckled on, the patient will 75 William st., N. ## Poetry. OVER THE RIVER.

Over the river they beckon to me, Loved ones who've passed to the other side; The gleam of their snowy robes I see, But their voices are lost in the dashing tide. There's one with ringiets of sunny gold, And eves the reflection of Heaven's own blue He crossed in the twilight gray and cold, And the pale mist hid him from mortal view.

We saw not the angels who met him there, The gates of The City we could not see ; Over the River, over the River. My brother stands ready to welcome me.

Over the River the Boatman pale Carried another-the household pet; Her bright curls waved in the gentle gale-Darling Minnie, I see her yet ! She crossed on her bosom her dimpled hands, And fearlessly entered the phantom bark; We watched it glide from the silver sands, And all our sunshine grew strangely dark, We kno a she is safe on the farther side, Where all the ransomed and angels be ;

S practiced in the best Mercantile Houses of Over the River, the mystic River, My childhood's idols are waiting for me. For none return from those quiet shores Who cross with the Boatman cold and blue We hear the dip of the golden oars, We catch a gleam of the snowy sail.

And lo! they have passed from our heart-They cross the stream and are gone for aye ! We cannot sunder the vail apart, That hides from our vision the gates of day Equation of Payments, Averaging Accounts, A count Currents, General Average, Partnership Settlements, &c., &c., seldom taught in other Shall sail with ours on life's stormy sea Shall sail with ours on life's stormy sea, Yet somehow I hope on the unseen shore

They watch and beckon and wait for me.

And I sit and think when the sunset's gold Is flushing river and hill and shore, shall one day stand by the water cold, And list to the sound of the Boatman's oar ; I shall watch for the gleam of the flapping sail, I shall hear the boat as it gains the strand, I shall pass from sight with the Boatman pale-To the better shore of the Spirit Land ! tended to render the Student familiar with the general principles of Law governing mercantile And joyfully sweet will the meeting be. A GLIMPSE OF LOVE.

BY T. BUCHANAN READ. She came as comes the summer wind A gust of beauty to my heart, Then swept away, but left behind Emotions which shall not depart.

Unberalded she came and went, Like music in the silent night, Which, when the burdened air is spent, Bequeaths to memory its delight;

Or like the sudden April bow, That spans the violet-waking rain : She bade those blessed flowers to grow Which may not fall or fade again.

Far sweeter than all things most sweet, And fairer than all things most fair, She came and passed with footsteps fleet, A shining wonder in the air.

## Farmers' Department. A THORNLESS BLACKBERRY.

blackberry found growing upon the farm of Mr. Chas. Henry, some four miles from this viliage, last season, at so late a period that we did not have time to do anything in the way of sending out samples. We have been watching its habits this season, hoping to be able to get a good crop and have some nice samples but owing to the excessive drought the crop is very slim and the berries quite diminutive in size to some found last season, so much so, that we hardly thought it best to send out any this year. The State Committee of the American Pemological Society for Massachusetts make the following Report upon Strawberries :- In strawberry culture we make Hovey's Scelling the standard variety by which we test other varieties. Brighton Pine fully sustains its previous good reputation. Boston Pine, as good as ever 'Hovey's Seedlings, as fine as formerly, and the standard sort. Jenny Lind, not extensively raised, but when grown is as satisfactory as formerly. La Constante the most beautiful in form and color; the finest foreign variety ever introduced. Scott's Seedlings is undoubtedly a fine variety, but is not extensively cultivated. Triomphe de Gand, large and handsome, but not of first quality. Wilson's Albany, poor quality, poor color, very acid, and good bearer. Buffalo is identical with McAvoy's Superior, which was discarded by us years ago. Frogmore Late Pine is a new variety, that promises well; larger size and quite late. Russell's Prolific is a fair bearer, but of poor quality. The berry is wrinkled and ill shapen not worthy of cultivation. The Agriculturist is a strong grower, a good bearer, tolerable flavor when nearly ripe, and of a scarlet color, and when fully ripe of a dark dirty color, and of decidedly poor flavor. French's Seedling is a scarlet soft berry, of poor flavor, lacking nearly all the qualities that go to make up a good strawberry. Lennig's White, Monitor, Brooklyn Scarlet, Green Prolific, Depford White, Progress, Lucinda perfecta, and Exposition de Chalons are all poor varieties. The Report is signed by J. F. C. Hyde, President of the Massachusetts Horticultural Society, Eben Wight and W. C. Strong.

Poctry. THE PEACE AUTUMN.

BY JOHN G. WHITTIER. Thank God for rest where mone molest, And none can make afraid, For peace that sits as Pienty's guest, Beneath the homestead shade !

Bring pike and gun, the sword's red scourge, The negro's broken chains, And beat them at the blacksmith's forge, To ploughshares for our plains.

Alike henceforth our hills of snow, And vales where cotton flowers; All streams that flow, all winds that blow, Are Freedom's motive-powers.

Henceforth to Labor's chivalry Be knightly honors paid ; For nobler than the sword shall be The sickle's accolade.

Build up an a'tar to the Lord, O grateful hearts of ours ! And shape it of the greenest sward That ever drank the showers.

Lay all the bloom of gardens there, And there the orehard fruits; Bring golden grain from sun and air, From earth her goodly roots.

There let our banners droop and flow ; The stars uprise and fall ; Our roll of martyrs, sad and slow, Let sighing breezes call.

Their names let hands of horn and tan And rough-shod feet applaud, Who died to make the slave a man, And link with toil reward.

There let the common heart keep time, To such an anthem sung, As never swelled on poet's rhyme,

Or thrilled on singer's tongue. Song of our burden and relief, Of peace and long annoy; The passion of our mighty grief

And our exceeding joy ! A song of praise to Him who filled The harvest sown in tears,

And gave each field a double yield To feed our battle years ! A song of faith that trusts the end To match the good begun,

Nor doubts the power of Love to blend

The hearts of men as one !

PLOUGHING UP RAW SOIL.

We sometimes hear farmers remark, that, ploughing deep, they get less grain; The Smallest Article sold for ONE DOLthat, bringing up the new mellow soil, their crops suffer. It would be very strange if this were not the case, for this soil, even if ever so mellow, is raw, just like manure when it is 'green 'or 'long.' It is not yet converted or changed into be sold for One Boilar, will be sold at the rate of TEN plant food. It needs just what the long CENTS EACH manure needs-to be changed by the heat

will not help the grain; and were it not Handserchi for the other soil mixed with it, an almost total failure would be the result.

But turn it up in the fall, and let the frost and the elements take hold of it, and you have another soil; it is turned into manure, a good part of it. A little lime mixed with it, scattered and harrowed in, or manure, or both, would facilitate the process. In the spring sow, either with or without another ploughing, and you will find no more occasion to complain. They find it pays, in the labor it saves next year. It TAKE PARTICULAR NOTICE. is partly on this account that onions are cultivated for years in succession upon the same land. It takes several years to get the weed and grass seeds out of the soil, and to give the crop the full benefit of the land. If the garden could have this thorough cleaning up, as fast as the crops are out of the way, it would make vegetables much cheaper. The peas are often out of the way in July, and the weeds have the ground the rest of the season. The potatoes and early cabbage are gone in August, and the weeds reign till frest comes. If you must have a crop to induce tillage, put in turnips. These will always pay where there is a pig or cow upon the premises. But with or without cultivated crops, keep every corner of the garden clean .- American Agri-
